REES AUTOMOBILE JACKS

Balloon

This Model is Designed to Satisfactorily Handle Any Passenger Car, Including Cars Equipped with Balloon Tires. It Will Go Under Any Axle which is Not Less than Six and One-Half Inches from the Ground with Tire Deflated and Raise it to a Height of Fifteen Inches in One Continuous Lift. The Two Upper Sections of the Jack Rise at the Same Time. It is a Worm Drive Jack Operated by a Long Folding Handle Connected to the Jack with a Universal Joint. Permitting it to be Easily Operated Without Crawling Under the Car. Well Made Throughout of the Best Materials, it will Stand Hard Usage and Give Long Service. It is Raised by Turning the Handle Forward and Lowered by Reversing Action Without Touching the Jack.
